PRODUCT DESCRIPTION

This sculpture, dating back to the 19th century in France, is a striking representation of a woman's hand crafted from bronze. The hand is delicately sculpted to capture the fine details of the fingers, nails, and the overall grace of the female form. What adds to the allure of this artwork is its placement on a marble base. The contrast between the cold, smooth marble and the warm, textured bronze creates a visual and tactile juxtaposition that enhances the overall aesthetic. Measures: 7" x 4" x 2.75"
