ALASKAN SNOW PHEASANT

SKU: tx600-asp
Categories: Taxidermy, Nature

PRODUCT DESCRIPTION

The Alaskan Snow Pheasant is a beautiful bird with unique features that make it a stunning addition to any collection. This bird is native to the Alaskan region and is well-known for its striking white plumage that blends in perfectly with the snowy environment it inhabits. This taxidermy specimen measures 32 inches in length, 8 inches in width, and 20 inches in height, making it a significant and impressive display piece. This bird has long, strong legs that are ideal for traversing snowy terrain, and its feet are equipped with sharp claws that aid in gripping and balance. The wings of the Alaskan Snow Pheasant are relatively short and round, contributing to the bird's distinctive shape. Overall, this Alaskan Snow Pheasant taxidermy specimen is an excellent representation of this unique and beautiful bird, and it is sure to be a treasured addition to any collection or display. Measures: 32" x 8" x 20"
