## PRODUCT DESCRIPTION

A handblown glass dome sits on an ebonized wooden base, presenting an elegant arrangement of butterflies in rich autumnal oranges and deep velvety purples, creating a striking, sophisticated palette. Each specimen is mounted "in flight" on fine brass rods, giving the composition sculptural presence and a sense of movement. The arrangement allows light to catch on the wings, highlighting their natural shimmer and transforming the piece into a statement object for any room. 20" H x 13" W x 13" D
