FLUORITE CHALICE, 6"

\$1,600.00

SKU: N/A

Categories: [Mineral](#), [Bowls & Boxes](#)

PRODUCT DESCRIPTION

Fluorite (also called fluorspar) is the mineral form of calcium fluoride, CaF_2 . It belongs to the halide minerals. It crystallizes in isometric cubic habit, although octahedral and more complex isometric forms are not uncommon. Measures: 6" x 6" x 3"
