---

**SKU:** SH10\_PSB-1

**Categories:** [Natural Specimens](#), [Nature](#), [Gift List](#)

## PRODUCT DESCRIPTION

Framed Yellow Stick Bug: Necrosiinae is a subfamily of the stick insect family Lonchodidae, with its greatest diversity in South-East Asia. The subfamilies Necrosiinae and Lonchodinae, formerly part of Diapheromeridae, were determined to make up a separate family and were transferred to the re-established family Lonchodidae in 2018. Measures: 8" x 8" x 1"
