PRODUCT DESCRIPTION

Column-shaped sellette in painted and gilded wood, featuring a fluted shaft topped with a square molded abacus and accented at the lower section with richly carved and polychrome grapevines, leaves, and clusters of grapes against a golden ground. The column rests on a stepped square base supported by four bracket feet, combining classical architectural elements with vibrant naturalistic ornamentation. Likely inspired by neoclassical design with a touch of rustic charm, this piece serves as both a decorative pedestal and a functional display stand. Dimensions: 13" depth × 13" width × 44" height.
