PRODUCT DESCRIPTION

A refined and large pair of Art Deco bronze fawn sculptures, cast by the esteemed Italian Chivrazzi Fonderia, each depicting a stylized young deer with elongated limbs, a slender neck, and the smooth, streamlined modeling characteristic of 1930s decorative modernism; measuring an impressive 36 inches high and 30 inches long, the fawns stand on their original stepped bronze bases and display a rich, even patina that highlights their elegant contours and subtle anatomical detailing. Designed as a facing pair for a harmonious, symmetrical presentation, they serve as striking statement pieces for entryways, consoles, or architectural settings, and remain in very good vintage condition with minor wear consistent with age. 8.5" x 30" x 30"
