PRODUCT DESCRIPTION

This large Pyrite Specimen stands at an impressive 8.25 inches in height, presenting a magnificent display of nature's artistry. Renowned for its metallic luster and golden hue, pyrite—often called "Fool's Gold"—embodies both the allure of gold and the strength of iron. This specimen showcases the crystal's natural cubic formations, with each facet reflecting light to create a dazzling effect. It serves not just as a stunning decorative piece but also as a symbol of abundance and prosperity. Ideal for collectors, enthusiasts, or as a statement piece in any space, this pyrite specimen brings a touch of natural glamour and geological wonder into your home or office, making it a conversation starter and a treasure to behold.
