PRODUCT DESCRIPTION

Opaline is an ethereal sculptural work by Hasharat, featuring a carefully composed arrangement of preserved butterfly specimens suspended within a glass dome. The piece brings together butterflies from the Pieridae, Nymphalidae, and Papilionidae families, selected for their pale, opalescent coloration and subtle natural iridescence. Balancing scientific precision with poetic restraint, the work explores themes of fragility, preservation, and beauty held in quiet suspension. Dimensions: 21 in. high × 13 in. diameter
