PRODUCT DESCRIPTION

This pair of 19th-century candle wall sconces features detailed repoussé metal panels mounted on rich leather backings, each depicting a traditional hunting scene—one with a hare and the other with a fox—surrounded by finely rendered foliage and hunting motifs. The wrought iron scroll arms hold two candleholders on each sconce, adding a functional yet decorative element. The intricate metalwork showcases the craftsmanship of the era, while the original patina enhances their vintage appeal. The oval shape, topped with a fleur-de-lis accent, brings a sense of classical refinement, making these sconces a perfect addition to any room seeking a touch of antique elegance and rustic charm. 8" x 11.5" x 19.5"
