A photograph showing two rectangular selenite logs. They are light-colored with a distinct crystalline texture and some darker, possibly charred, ends. One log is positioned horizontally in front of the other, which is slightly behind it.	SM160	\$300.00	14" - 18"

PRODUCT DESCRIPTION

CREEL AND GOW

Selenite Logs. Selenite Fireplace Logs (actual real wood log size) create a beautiful and luminous environment for any fireplace. These are natural crystalline columns from North Africa. Selenite is a pearly variety of gypsum. It's named after the Greek goddess of the moon due to its sheen. Each log of selenite is hand-cut and picked for its capacity to sparkle and reflect light. Medium size log ranges from 14" to 18" Large size log 18"+
