

CREEL AND GOW

SELENITE SPHERE, LARGE

SKU: SM450_SS

Categories: [Mineral](#), [Points & Spheres](#)

PRODUCT DESCRIPTION

Selenite Sphere, Large: Diameter Measures: 6" Selenite is a form of gypsum. There are many crystalline forms of selenite/gypsum. Sometimes they are grouped together under the name selenite. When gypsum forms clear and colorless crystals it is called selenite. When it is opaque with fibrous texture it is called satin spar.
