PRODUCT DESCRIPTION

This large carved wooden foot showcases a stylized representation of the human form, with a focus on simplicity and an unembellished approach. The carving features defined toes and a slightly rounded shape, suggesting a blend of functional design with artistic expression. Painted details remain, particularly along the base where traces of blue paint hint at its original color scheme. The overall texture is modest, and the paint has worn over time, adding to its character and appeal. 16"L x 6" x 10.5"H
