TREASURES OF THE EARTH: MONUMENTAL PYRITE SPECIMEN

\$4,200.00

SKU: SM42M

Categories: [Mineral](#), [Natural Specimens](#)

PRODUCT DESCRIPTION

Large mounted pyrite cluster featuring densely packed, naturally formed cubic crystals with a striking metallic luster, characteristic of fine pyrite specimens. The interlocking crystal faces reflect light dramatically, creating a dynamic surface texture. The specimen is mounted on a sleek black metal display stand, enhancing its sculptural presence and allowing for 360° viewing. Dimensions: depth 5", width 15.5", height 12.5" (including base).
